

# Raw Milk Distributed as Pet Food

**Bob Geiger**

**Feed Administrator**

**Office of Indiana State Chemist**

# Raw Milk

Currently, Indiana is one of 20 states that does not allow the sale of raw milk for human consumption.

The term in the feed law “**raw milk**” and “**raw milk products**” means milk that has not been pasteurized.

All milk sold interstate is regulated by the Pasteurized Milk Ordinance regulated through FDA,

# Raw Milk as Pet Food?

Distributing Raw Milk as pet food requires:

1. **The container must be adequately labeled throughout the distribution process.**
  2. The party responsible for distributing the milk must be listed on the label along with the city, state, and zip code of the party.
  3. The party responsible must complete and be approved for an Indiana Commercial Feed License. This requires an annual fee of \$50.00 prior to distribution and renewed by January 1<sup>st</sup> each year.
- For distribution for pets (dogs and/or cats) in packages of ten pounds or less requires an additional listing or registration fee of \$50.00 per product.

**Prominently labeled “Not for Human Consumption”**

# The container must be adequately labeled throughout the distribution process

The label must contain –

The product name or description.

The target species for the feed.
